

Hip Replacement Package — One Hip

Hip replacement surgery can help relieve pain and restore function in severely damaged or diseased hip joints. The procedure involves replacing the hip joint with an artificial joint. Modern hip replacements usually allow normal function and are expected to last for many years.

The *Smith & Nephew Polar 3 Verilast* implant using an *Oxinium* (oxidised Zirconium) femoral head, included in this package, is a premium implant, and is the best-performing cementless total hip replacement in the National Joint Register for England & Wales.
