

Robotic Assisted Total Hip Replacement Package (Smith & Nephew Implants)

HK\$ **186,000**^{Up}

Total hip replacements performed using the minimally invasive SPAIRE technique enable quick recovery, excellent functional outcomes, and short hospital stays, with minimal post operative restrictions. These benefits are further enhanced by robotic assisted technology, which allows for highly precise implant positioning.

Premium Smith & Nephew Polar 3 titanium implants with Verilast bearings—constructed from oxidised zirconium paired with cross linked polyethylene—are among the top performing implants in the National Joint Registry for England and Wales.

Total Care Package Price (Standard Room)
